

Latex rubber

SPEARGUN RUBBER

Sea Hornet genuine latex rubber is formed using the dipped layer process where the inner layers remain natural and the outer layers are carbon impregnated. This high tech process is designed to extend the life of natural latex, enhancing the physical properties and offering up to 1000% elasticity. Adapted for use with dyneema and stainless steel bridles.

Dyneema
Bridle

Stainless Bridle:
Saddle Wire & Nut

HANDSPEAR AND HANDSPEAR GUN RUBBER

To suit telescopic handspears & handspear guns. Also 2 piece stainless steel handspear, aluminium & fibreglass handspears.

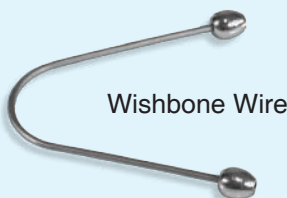

BULK RUBBER

Available for the dedicated hunter wanting to make their own speargun rubbers. High tech process: Cold Dipped Natural Latex for long life and maximum power. [Check the Sea Hornet website for the facts about power.](#)
